

Bruno Comtois

**Section Chief, Product Lifecycle, Management Process -
Product Definition, Bombardier Aerospace**

Lead Project Engineer, 2010 Olympic Torch

“I couldn’t stop thinking: this incredible project, the Olympic torch, is a once-in-a-lifetime opportunity. We all had to step out of our comfort zone and surpass our limits.”

Mr. Comtois possesses extensive background in project scheduling and resource management from his current position with Bombardier Aerospace, where he manages a group responsible of redefining engineering processes for product definition.

With Bombardier since 1995, Mr. Comtois previously designed as well as determined furnishings and other structural element improvements within various projects. His experience in troubleshooting, designing, and manufacturing, in addition to project management credentials has played a critical role in the Olympic Torch design.

Mr. Comtois obtained a Bachelor’s Degree in Mechanical Engineering from Sherbrooke University.
